DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 20-26, drawn to a process of locating a coil group insertion tool, classified in class 29, subclass 464.
 - II. Claims 27-33 and 48-54, drawn to a process of making a motor stator, classified in class 29, subclass 596.
 - III. Claims 34-40 and 41-47, drawn to a process of inserting coil groups, classified in class 29, subclass 606.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of Groups I, II and III each have separate utility such as: locating a coil group insertion tool as required by Group I; repetitive steps of inserting and rotating as required by Group II; and specifically inserting six coil groups for three electrical phases as required by Group III. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for either of Groups II and III, the search for Group II is not required for either of Groups I and III, and the search for Group III is not required for either of Groups II and I, restriction for examination purposes as indicated is proper.
